

WHERE YOU WANT TO BE.

PEARL[®]

PEARL[®]

**BIG on performance,
BIG on portability.**

Getting out and about in comfort and style couldn't be easier than with the Sterling Pearl scooter. Whether it's travelling to town, around the supermarket or just down the street, the Pearl is highly manoeuvrable and it's lightweight and compact size means it will fit easily in the back of your car, giving you the versatility to take your scooter wherever you want to go.

Portability

Using the popular Gem-Lock mechanism, dismantling of the Sterling Pearl is child's play. The frame and drive unit separate in seconds – all by the press of a lever. There is no need to remove screws, no use of tools and no cables.

Although a medium sized scooter with a 136kg (21 stone) user weight capacity, the Pearl is also very lightweight. When disassembled, the heaviest part weighs just 16kg (35.2lbs).

The Sterling Pearl also has a range of up to 24km (15 miles) and a speed of 6.4kph (4mph), making it ideal for both short trips and longer excursions. All this, coupled with an attractive, distinctive look ensures that you always ride in style with a Sterling Pearl.

Performance

The Pearl doesn't just look good, it's also been designed to be both practical and easy to use. With the new standby function, the Pearl hardly wastes any energy and conserves battery power. This results in an increased range of up to 24km (15 miles).

The Pearl's superior handling and drive characteristics will also impress you. A turning circle of just 117cm (46") gives excellent manoeuvrability, whilst the narrow profile helps you to navigate through even the smallest of spaces.

Wireless connections

Powerful, long range 21 amp batteries, with handles for easy removal or fitting

Simple to use controls with sleep mode function

Comfortable seating

PEARL®

BIG on performance, BIG on portability.
