

Sonet

Eastern Mobility
Keeping East Anglia Moving

MAX WEIGHT 25 stone, MAX SPEED 6 mph, RANGE 25 miles, VEHICLE CLASS 3

Metallic Red or Metallic Black

The TGA Sonet is extremely easy to live with. A mid-range, mid-sized scooter offering the highest levels of comfort, manoeuvrability and safety, finished with a pleasing air of quality, to get you out and about in style.

The Sonet is designed to meet the needs of those who don't need the portability of a small scooter and who don't want the bulk of a larger model. The Sonet has compact dimensions without compromising on user comfort and safety.

Sleek styling and looks from the beautifully contoured bodywork to polished alloy wheels. The attention to detail continues to the instrument panel with simple touch panel controls for the lights indicators and horn. The delta shaped handlebars allow the user to choose their most comfortable hand position with simple controls operated by either fingertips or thumbs.

The comfortable contoured seat is fully adjustable backwards, forwards and for height. It even swivels through 360 degrees to make getting on and off easy. The backrest, armrests and headrest are all adjustable as is the tiller, to enable everyone to find a truly comfortable driving position.

This versatile scooter also comes with an impressive array of standard equipment. Front basket, rear seat storage pocket, tiller mounted cup holder, hard wearing floor coverings and twin rear view mirrors are all included as standard, as are front and rear lights and indicators. Additional safety features include hazard warning lights, reverse warning indicator and anti-tip wheels.

A smooth and quiet ride at up to 6mph is assured by a powerful motor giving the Sonet the power to carry up to 25 stone in weight. The full all-round suspension and large pneumatic tyres guarantee a carefree and comfortable journey.

To complete this excellent package the Sonet is fitted with a removable on/off key switch and an electronic sleep mode that turns off your machine if you forget to. One of the best scooters your money can buy, the all-round ability of the Sonet represents all the innovation and quality you have come to expect from TGA.

- Large scooter features in an easy to handle and compact package
